

SCIENCE, HEALTH CARE AND ECOLOGY

www.medicalhelpnet.com/

This comprehensive web site addresses preparation and application for a variety of health careers. For instance, you can identify colleges offering combined BA/MD programs here.

<http://explorehealthcareers.org>

Getting Started helps students decide if a health care career is right for them, and provides a database of 500 scholarships. Other sections of the site are titled **Career Explorer** and **Profiles**. Nineteen fields are covered, with less well known options such as Arts & Humanities in Health, Complementary & Alternative Medicine, and Forensic Science included.

www.science.education.nih.gov/LifeWorks

Search for careers in health care and medical science by “interest” (artistic, investigative, social, etc.) or “education required” at this web site. Profiles of real people who are successful in their careers are included. Descriptions of 100+ jobs include recommended high school courses.

www.healthjobsstarthere.com

CA’s health care jobs and career opportunities web site directs students to areas of health care “where the need is great and the opportunities are plentiful.”

www.ama-assn.org/ama/pub/category/14598.html

Download flyers describing 50 careers careers, such as art therapy, dietetics, kinesiotherapy, physical therapy, physician’s assistant, and genetic counseling at this web site.

www.ast.org/pdf/GrowingCareer.pdf

Surgical Technology is a fast growing career. Find out about training and job duties here.

www.medsci.pomona.edu/links.shtml

Pomona College provides links to many web sites providing valuable information for students who are pursuing a pre-medical program of study.

www.aacn.nche.edu

www.nursingworld.org

www.discovernursing.com

www.nln.org

All these web sites offer information about nursing. Start with the first link to the American Association of Colleges of Nursing, offering a Nursing Fact Sheet, and providing tips on applying, choosing a program, and accreditation. The Discover Nursing web site publishes a list of nursing schools that do not have a wait list for applicants.

www.sirc.ca

Sports science and sports medicine information is posted here.

www.spsnational.org/cup/profiles

What can you do with a BS in Physics? What careers require an advanced degree? Find out at this web site.

www.careercornerstone.org

This is a resource center for anyone interested in exploring career opportunities in computing, engineering, healthcare, mathematics, science, and technology. Under “Pre College Ideas” you can find a directory by state of STEM Summer Programs and Camps.

www.forensiccrimelab.com/training.htm

Link to collegiate programs in the US and other English-speaking countries at this site.

www.aafs.org

The American Academy of Forensic Sciences web site provides information about graduate and undergraduate programs in this field. Click on “Resources.”

<http://ncseonline.org/DEP>

Find a listing of schools here that offer ecology and other environmental majors.

www.awma.org

The Air & Waste Management Association’s web site offers information on scholarships and a list of US colleges that offer environmental degrees.
