

DISCLAIMER FROM THE PFC WEBMASTER

Internet Explorer is my browser of choice. Accordingly, I can say with relative confidence that you should not have any significant issues accessing the site and its various links and documents using the Internet Explorer browser (v6 and up).

I realize that on occasion one may feel as these two chaps do when encountering a cryptic error message from the site when accessing it using other browsers such as Safari or FireFox. Heck, maybe even with Internet Explorer.

As I am only a part-time volunteer computer geek wannabe, all I can suggest as to what causes such problems is that gremlins have invaded your system. Try rebooting, or using Internet Explorer.
